## PROFILE SUMMARY

Dynamic Fullstack Developer and Blockchain Specialist with over X years of experience crafting seamless user experiences and integrating cutting-edge blockchain technology. Proven track record of leadership as an IT Manager, adept at project management and team collaboration. Passionate about exploring the intersection of technical excellence and strategic vision to shape the future of technology.

## PROFESSIONAL EXPERIENCE

### IT Manager

KBNET, Algiers

September 2023 - February 2024

- 1- Despite my role as IT Manager overseeing a small team, I took on the responsibility of independently designing and developing a complete website, showcasing my hands-on expertise and commitment to delivering high-quality solutions even in challenging resource constraints.
- 2- Staying updated with the latest technology trends through industry conferences, webinars, and workshops ensures innovative solutions and staying ahead of the curve.
- 3- Building a strong team of passionate professionals fosters a collaborative work environment, where continuous learning and growth are encouraged.

### Fullstack Developer

FIVERR, Algiers

April 2021 - March 2024

- 1- Developed and delivered a wide range of projects for clients on Fiverr, including responsive websites, web applications, and custom software solutions.
- 2- Leveraged expertise in front-end technologies (HTML, CSS, JavaScript) and back-end frameworks (Node.js, Express.js, Django) to create dynamic and user-friendly interfaces.
- 3- Integrated third-party APIs and implemented database solutions (MySQL, MongoDB) to enhance functionality and data management capabilities of client projects.
- 4- Collaborated closely with clients to understand their requirements, provide regular updates, and ensure timely delivery of high-quality solutions that exceeded expectations.

## EDUCATION

### Animal Biologie & Physiologie

USTHB, Beb Zouar

**While it may seem unconventional,** my passion for Animal Biology and Physiology stems from a deep curiosity about the intricate systems that govern life, whether in the digital realm or the natural world. As a software engineer and full-stack developer, I thrive on understanding complex systems and finding elegant solutions to challenges, whether it's coding a sophisticated algorithm or unraveling the mysteries of animal behavior.

Studying Animal Biology and Physiology enriches my perspective and fuels my creativity. It teaches me about adaptation, resilience, and the delicate balance of ecosystems – concepts that I often parallel with software architecture, user experience design, and project management.

Welcome to My Portfolio, a platform where I showcase various innovative projects I've worked on. This portfolio website is designed as a HTML5 clone with features inspired by different applications and tools. Let's explore the projects and technologies used:
